Defect Reports - Release 4.7

Raised by: Priya Sharma | Brightline Softech (fictional) | Tracker export

BUG-231 Severity: **Critical** | Priority: **P1**

Title: Duplicate charge when payment retry is clicked after gateway timeout
Environment: Staging, Chrome 97, build 4.7.2.
Steps to reproduce:

- Add item to cart
- Proceed to payment
- Simulate gateway timeout
- Click Retry

Expected: One charge. **Actual:** Two charges recorded in the payment log.
Status history: Open → In Progress → Fixed → Verified by tester on build 4.7.3.
Attachments: Attachment A (payment log excerpt) and Attachment B (checkout screen at failure) on the following pages; screen recording kept in the tracker.

BUG-244 Severity: **Major** | Priority: **P2**

Title: Order history shows wrong date format for IST users
Environment: Staging, Firefox 96, build 4.7.3.
Steps to reproduce:

- Log in as a user with IST time zone
- Open Order history
- Compare displayed dates with order confirmation e-mails

Expected: Dates shown as DD-MM-YYYY in IST. **Actual:** Dates shown in the MM/DD/YYYY US format.
Status history: Open → In Progress → Fixed → Closed.
Steps to reproduce and root-cause notes written by the tester; verified the fix after deployment and closed the defect.

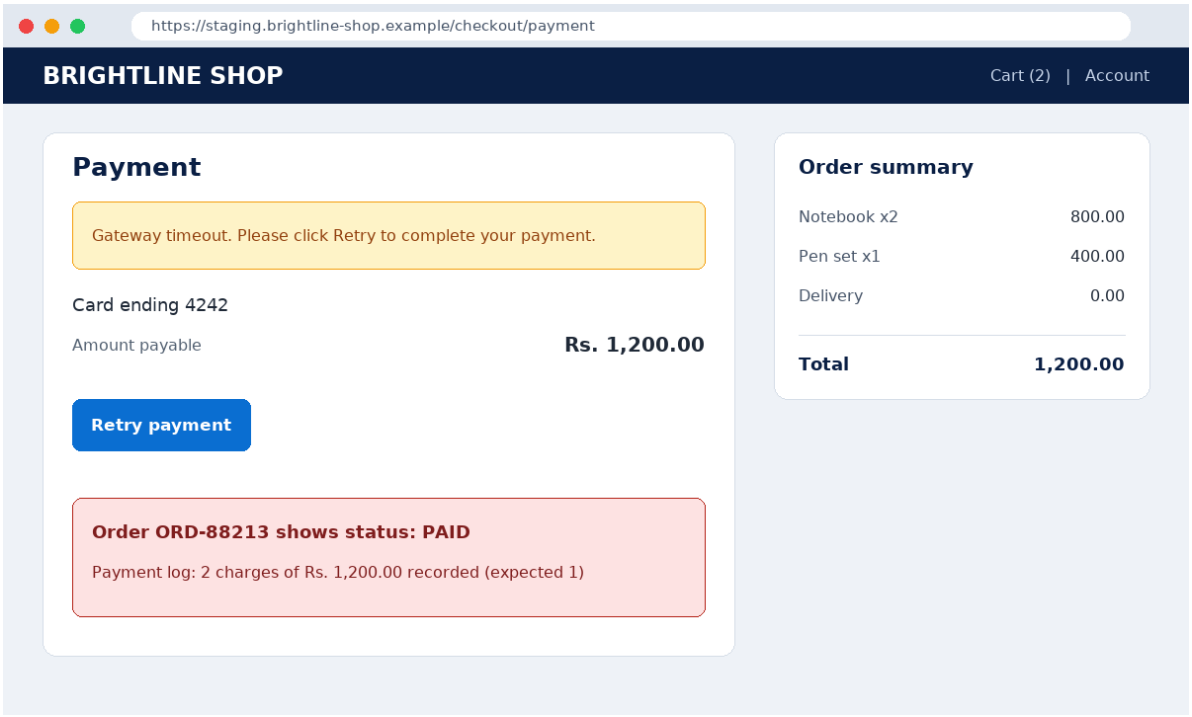

Root cause: the date formatter used the browser locale instead of the account time zone setting. Fix verified on build 4.7.4 in Chrome and Firefox.

ATTACHMENT A - Payment log excerpt (BUG-231)

Lines 4 and 5 show the second charge created by the retry request.

ATTACHMENT B - Checkout screen at failure (BUG-231)

The order shows PAID while the payment log records two charges.
