SUMMARY

Software tester with three years of experience in manual and regression testing of web applications. Returning to work after a four-year career break (2022-2026) for family caregiving. Recently refreshed my skills through Python practice and an online testing course.

EXPERIENCE

Junior Software Tester, Brightline Softech Pvt Ltd (fictional), Noida January 2019 to March 2022

- Tested the checkout, payments and order-history modules of an e-commerce web application.
- Wrote and executed regression test cases for every fortnightly release.
- Logged and tracked defects and verified fixes with developers.
- Participated in daily stand-ups and sprint reviews in a Scrum team.

SKILLS

- Manual testing, regression testing, smoke testing
- Test case design using boundary value analysis and equivalence partitioning
- Defect reporting and tracking
- Proficient in Selenium WebDriver automation
- Basic SQL queries for test data validation
- Python (beginner), Git and GitHub
- MS Excel (pivot tables, conditional formatting)
- Languages: Hindi (native), English (professional)

EDUCATION

B.Sc. (Computer Science), 2018

CERTIFICATION

Software Testing Fundamentals - online course, completed June 2026
