Regression Test Suite - Checkout Module

Release 4.7 | Prepared by: Priya Sharma | Reviewed by QA Lead

SCOPE

Created and executed 42 regression test cases for the checkout, coupon and payment-retry flows across Chrome and Firefox.

TECHNIQUE

Boundary value analysis was applied to coupon amounts (0, 1, 499, 500, 501) and equivalence partitioning to card-number formats.

RESULTS

39 passed, 3 failed. All failures linked to defect IDs and retested after fixes.
